PAL LAB

Report on Multiplier Event Belgium

Author: Evgenia Karagianni

Date: 16/09/2024

Logistics of the Multiplier Event

The Multiplier event for the PAL LAB project was held online via Microsoft teams, organized by the team of PAL Network, on September 16th, 2024, from 2pm to 4pm CET. There was a total of 23 participants that joined, responding to an invitation from PAL Network. The participants were teachers, educators, mentors, or advocates for Roma rights, experts in the area of research on early school leaving.

Feedback from the Multiplier Event

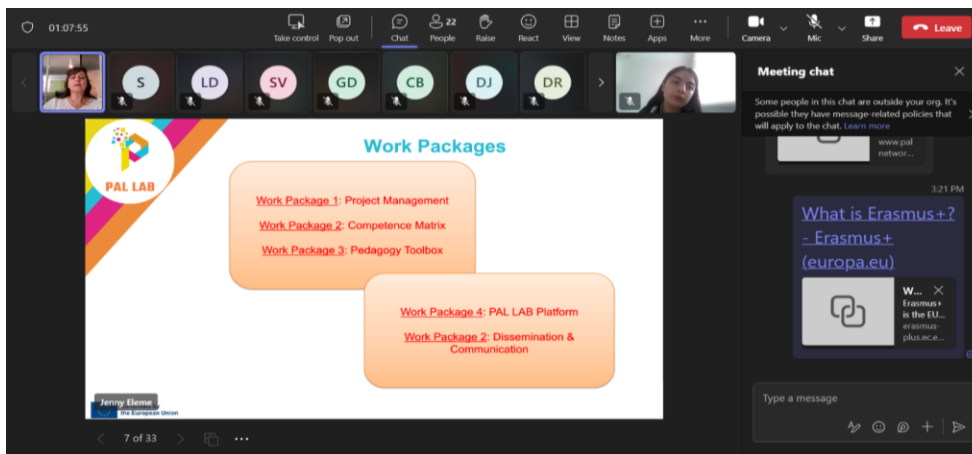

The meeting started with welcoming words and registration, as participants were required to sign the participants list. At the beginning of the Multiplier Event, members of the team of PAL Network gave a presentation on the organization, and the Erasmus+ program. After that the program consisted of presentations of the Main Project Results such as the competency matrix for teachers and mediators working with Romani children and youth, the Interviews with teachers and mediators, development of the training modules and peer review, etc. A big part of the presentation concentrated on the Modules developed as part of the Pedagogy Toolbox and the pallabeu website with the e-learning platform. The speaker urged the participants to visit regularly and proceed with their registration in order to study the material included. The participants gave positive feedback and shared their admiration for the results of the project, and then discussed their Implementation, focusing mostly on the Training modules and the platform. Below is a timeline of all the topics discussed throughout the multiplier event:

- The PAL NETWORK
- The Erasmus+ Programme
- Introduction to the PAL LAB Project
- Analyses of the Main Project Results
- PR1: Competence Matrix for teachers and mediators working with Romani children and youth: State of the Art Review, Interviews with teachers and mediators, Synthesis Report, Inception Meetings, Competence Matrix.

- PR2: Pedagogy Toolbox for teachers and mediators: Manual of Implementation and templates, Development of Training Modules, Peer review and testing, Training of trainers in Sofia Bulgaria, Finalization of Toolbox.
- PAL LAB Platform: Browsing through the Pal Lab website, Entering the e-Learning Platform and creating accounts, Showcase Module 3.

Innovation of the project

PAL LAB is working on the development of an innovative **Pedagogy Toolbox** for teachers and mediators, considering the following five pedagogical approaches:

- **Flipped classroom**, blended learning where students are introduced to content at home and practice working through it at school, and introducing different mobile tools to update information;
- **Integrated learning**, using the integration of art-related topics with lessons of science and math to enhance the interest of the children and support their art talents;
- **Open labs approach** is considered a fresh approach that lets children use outdoor areas for research and demonstration of projects, independently driven projects and new contexts for research and sustainability as well as related to environmental sustainability;
- **Open schooling approach** of fostering science education for all, by linking science learning processes to children' participation in real-life science challenges in society and real research;
- **Children's universities approach** encourages pupils' participation in extracurricular activities in and outside of school, with a focus on tertiary institutions, that allows pupils to make use of outdoor spaces for projects.
